

ETABS Level 1 Workshop

Academic–Industry Collaboration Program

1. Program Overview

The ETABS Level 1 Workshop is an exclusive 3-day offline campus training program designed to bridge the gap between academic learning and industry practice. Conducted directly at your college campus by the eConstruct Design and Build team, this program offers hands-on structural engineering experience.

2. Detailed Syllabus

Module 1: Introduction to ETABS

- Software algorithm & Capabilities
- Strengths and weaknesses of the software
- ETABS manual & Significance of menu buttons/icons
- Sample models and templates
- Hands on software on sample templates

Module 2: Modelling Process and Techniques

- Geometry creation process
- Modelling through import method: 2d import, 3d import & other techniques
- Property assignment through automation existing templates
- Loadings: dead, live, wind, earthquake, temperature, notional, live load reduction
- Details of wind tunnel & its loadings, standardization of wind/ETABS model
- Releases, diaphragms, all definition parameters
- Checks on modelling techniques
- Modelling of steel & composite structure
- Hands on software to perform the modelling process and techniques

Module 3: Analysis Process and Techniques

- Static analysis, Dynamic analysis & Second order p-delta analysis
- Sequential analysis & Time history analysis
- Significance of each analysis and its uses
- Checks on lateral stability, deflection, storey drift, torsional/mass/stiffness irregularity
- Hands on software to perform the analysis and its checks

Module 4: Design Methods and Techniques

- Design of columns and beams: methodology & limitations
- Design of composite columns
- Design of walls & slabs

3. Target Audience

- Final-year B.Tech Civil Engineering students
- Pre-final-year B.Tech Civil Engineering students
- M.Tech Structural Engineering students

Minimum Batch Size: 50 Students

4. The Learning Journey

Phase 1: 3-Day Offline Campus Workshop

Intensive, in-person training by industry experts covering ETABS fundamentals, modeling, analysis, and design strategies.

Phase 2: 45-Day Online Practice Program

Continued learning with access to pre-recorded videos and weekly live doubt-clearing sessions to ensure complete mastery.

Phase 3: Two Project Completions

Mentorship and guidance to help students successfully complete two practical structural projects.

5. Program Investment & Payment Terms

Program Fee: ₹12,000 + GST per student

The payment is structured in two parts:

- 50% Advance Payment at the time of online booking.
- 50% Balance Payment after the completion of the 3-day offline campus workshop.

6. How to Book

- Step 1: Visit the Corporate Training section on the eConstruct website.
- Step 2: Choose your preferred workshop date from the interactive calendar.
- Step 3: Fill in the college details and expected student count.
- Step 4: Make the secure 50% advance payment online.
- Step 5: Receive immediate booking confirmation and coordinate logistics with our team.

For more details, please visit our website or contact the eConstruct Training Department.
